

I would like to encourage the FCC to leave the "do not Call" list as it stands in the State of Indiana. We signed up for the list simply because we wanted the privacy of using our telephone without being interrupted by telemarketers. Our home has been so peaceful without the constant ringing of the phone. I also have elderly parents who have signed up for this list. They are not able to comprehend exactly what the solicitors have to offer and have actually been "victims" of overbearing telemarketers. Please stop the violation of our homes and the targeting of our elderly on fixed incomes. Telephone communications are so vital to our homes but we should not have to deal with unwanted solicitors. Thank you for your attention.
